Profile

I'm currently working as the web and graphic designer for Mabuno Gallery on Cedros in Solana Beach. I was recently employed at Einstein Industries as a Production Assistant where I gained the bulk of my current skills building websites for Doctors, Dentist, and Lawyer firms. I graduated from Platt College in June 2007, where I received valuable web training. I obtained my Bachelor of Arts, with an emphasis in Media from UC San Diego in 2004. I have a keen understanding of the key components of graphic design, video production, and animation. As of now I am very familiar with html, javascript, and php, but am continually trying to learn more about these fine languages.
